

LINK SCHOOL OF BUSINESS
FINANCIAL AID & DEFERRED TUITION FAQ
ADMISSIONS PROCESS - 2027-1

LINK SCHOOL OF BUSINESS – FINANCIAL AID & DEFERRED TUITION FAQ

1. DOES LINK SCHOOL OF BUSINESS OFFER SCHOLARSHIPS?

Yes. Link School of Business offers institutional need-based scholarships to qualified students.

Scholarships are designed to make a Link education accessible to talented and promising students from different financial backgrounds. Scholarships may cover up to 90% of tuition for a semester, depending on the student's demonstrated financial need and the availability of scholarship funds.

Scholarships are applied directly as a reduction to tuition charges, have no cash value, and do not need to be repaid.

2. HOW DOES LINK'S SCHOLARSHIP MODEL WORK?

Link separates the admissions process from the financial need assessment. First, applicants complete Link's admissions process, which evaluates their academic qualifications, entrepreneurial profile, potential, mindset, and fit with the institution.

Students who are admitted to Link have already met the merit and academic standards required for scholarship eligibility. After admission, students requesting financial support may submit a scholarship application and supporting financial documentation.

Link's Scholarship Committee then evaluates the student's demonstrated financial need and determines whether a scholarship will be awarded and, if so, the applicable scholarship percentage.

3. IS THERE A FINANCIAL VERIFICATION PROCESS?

Yes. Students applying for a need-based scholarship are required to provide financial information and supporting documentation so that Link can evaluate their demonstrated financial need.

Depending on the applicant's circumstances, the Scholarship Committee may request additional documentation or clarification necessary to understand the student's and, when applicable, the family's financial capacity.

All financial information submitted as part of the scholarship application is reviewed separately from the admissions decision.

4. HOW MUCH SCHOLARSHIP SUPPORT CAN A STUDENT RECEIVE?

Need-based scholarships may cover up to 90% of tuition for a semester. The scholarship percentage is determined individually based on demonstrated financial need, the information and documentation provided by the student, and the availability of scholarship funds.

Receiving a scholarship in one semester does not automatically guarantee the same scholarship percentage in future semesters.

5. DOES A SCHOLARSHIP NEED TO BE REPAID?

No. Link's institutional scholarships are gifts and do not need to be repaid. The scholarship is applied directly as a reduction to the student's tuition charges. It is not paid in cash to the student, cannot be transferred, and has no redeemable cash value.

6. WHAT HAPPENS TO THE SCHOLARSHIP IF A STUDENT WITHDRAWS?

If a student withdraws or cancels enrollment, Link's applicable cancellation and refund policies will apply to the student's account.

Because scholarships are applied directly as a reduction to tuition and have no cash value, students do not receive the scholarship amount as a cash refund.

Any applicable tuition adjustment or refund will be calculated in accordance with Link's published refund and cancellation policies.

7. CAN A SCHOLARSHIP BE RENEWED?

Yes. Scholarships are awarded on a semester basis and may be renewed, subject to continued eligibility.

To remain eligible, students must maintain Satisfactory Academic Progress (SAP), comply with attendance and conduct requirements, remain current on tuition and fees not covered by the scholarship, and provide updated financial documentation when requested.

The Scholarship Committee may reassess the scholarship amount based on material changes in the student's financial circumstances and the availability of scholarship funds.

8. DOES REQUESTING A SCHOLARSHIP IMPACT THE ADMISSIONS DECISION?

No. Link's admissions process is conducted independently from the financial need assessment.

Applicants are evaluated for admission based on their qualifications, entrepreneurial profile, potential, mindset, and fit with Link, not their financial circumstances.

Only after a student has been admitted does Link evaluate the student's request for need-based scholarship support. Admission therefore establishes that the student has met Link's merit and academic standards; the subsequent scholarship process evaluates demonstrated financial need.

This separation allows Link to identify exceptional entrepreneurial talent regardless of a candidate's economic background.
